Profile Summary

I spent 15 years working with customers before I started building products for them: coaching in health and performance, leading a team of 11 in a facility serving 1,000+ people a day, and working in a rehab clinic. Over 5 years in digital product and growth work, that has let me find real friction fast and ship the fix: an 80% drop in customer enquiries after one UX rebuild, 85%+ fewer clicks to find availability, and a referral marketplace that placed 6 customers in its first week. I validate before I build, make the call to stop when the evidence doesn't stack up, and can build what I spec (Next.js, AWS, Claude API). Now bringing this to health tech, where removing friction helps people stay healthy.

Experience

Product Lead
Systema Tennis, Tennis Network & CourtDesk
Apr 2023 - Present • Sydney

- **Product portfolio** - Built and launched three connected products in Sydney's sport and wellbeing market: a consumer service brand, a two-sided booking and discovery platform, and a B2B SaaS tool for independent service providers.
- **Customer discovery** - Validated booking friction with 10+ venue operators and 20 users, delivering a single availability view that cut search steps by 85%+ (from 14–20 clicks to 2) across 12 venues. When the data source added bot protection, stopped a working workaround on compliance risk and pursued official access.
- **Acquisition** - Built intent-led search funnels and location pages for Google and AI-assistant search, reaching page-2 rankings within 3 months and 6–10 inbound enquiries a week.
- **Referral marketplace** - Found customer enquiries in the market often waited 24 hours to a week for a reply; set a 12-hour response standard and launched a first-come-first-served network with 5 independent providers ($20-per-session finder's fee for 10 sessions, up to $200 per placed customer), placing 6 customers in the first week. Added verified provider profiles and 3 brand partnerships.
- **Automation design** - Running the network manually while designing a WhatsApp intake flow that qualifies enquiries, broadcasts them to providers, shares details only with the accepting provider and confirms the booking.
- **B2B SaaS discovery** - Ran 16+ interviews with independent providers to scope CourtDesk, a unified WhatsApp and email inbox with scheduling, attendance and payments; designed Solo ($39) / Pro ($99) pricing and lined up 8 founding customers for the pilot.
- **AI-native delivery** - Run research, critical review and build through a multi-agent Claude Code setup governed by shared context files I write, so one person ships production features in ~2–3 hours a day across three products.

Digital Consultant
DigitalBuilders.co
May 2022 - Present • Sydney

- **Healthcare consulting** - Assessing whether a two-clinic physiotherapy practice should keep or redirect its paid ad spend, by tracing ads through to booked and retained patients across the website, booking flow, rebooking and Cliniko workflow; delivering a roadmap and playbook for the admin team.
- **AI opportunity validation** - Validated an AI opportunity in financial services before committing to build: prototyped compliance review on the Claude API with page-level evidence, human review and data redaction, and tracked token cost per run to test unit economics; reviewed with a wealth-management platform's CPO and CTO.
- **Client delivery** - Delivered 8 client websites across health, services, sport and community, packaged into Starter, Professional and Premium tiers.

Head of Digital Strategy
Coogee Beach Tennis
Jan 2021 - Jan 2025 • Sydney

- **UX and conversion** - Interviewed customers and staff and rebuilt the highest-revenue program page, reducing registration-window enquiry emails from ~300 to ~60 (80%) and lifting organic search clicks 300% term on term.
- **Audience growth** - Grew social following 685% and content reach 27,000%+ at under $50 per campaign.
- **Partnerships** - Coordinated a multi-site growth initiative integrating 450 new customers across 8 venues.

Operations & Event Manager
ESTA NSW Interclub Competition
Apr 2021 - Jun 2024 • Sydney

- **Multi-stakeholder operations** - Ran a multi-site program across 9 venues and 248 participants as a first-time operator.
- **Process design** - Agreed one set of rules with all 9 venue operators and built self-service systems, cutting weekly workload from 10 hours to 2–3.

Front-end Developer
Sisterhood Club
2021 - 2023 • Remote

- **Cross-functional team** - One of four core team members on an education platform for women in tech; owned the React front end and prioritised the ticket backlog, contributing to ~US$26k in revenue after a pivot.

Facility Supervisor
Coogee Diggers
Mar 2013 - 2020 • Sydney

- **Team leadership** - Led a team of 11 staff at a leisure, fitness and aquatic centre serving 1,000+ patrons a day, keeping every lifesaving and first-aid certification current.
- **Operational excellence** - Ran daily operations, safety and incident response, and turned team-tested improvements into consistent daily processes.
- **Systems** - Managed POS, membership systems and end-of-day cash reconciliation.

Previous roles in health and technology: Administrator, Physio Posture Fitness (2018–19); Product & Engineering, Hazumi (2022–23); Freelance Software Engineer, CyberAssist (2021).

Skills and Competencies

Customer Discovery	Stakeholder Management	Next.js, React, TypeScript
Product Strategy	Team Leadership	Node.js & PostgreSQL
Roadmapping	Process Improvement	AWS & REST APIs
MVP Scoping	UX Research & Figma	Claude API & Claude Code
Pricing & Packaging	GA4 & Search Console	n8n Automation
Success Metrics	SEO & Conversion	Systems Thinking

Education & Recognition

- Software Engineering Immersive - General Assembly (2019)
- Google UX Design Professional Certificate - Coursera (in progress, 2026)
- LLM Application Development courses - DeepLearning.AI (2023–24)
- ATPCA Level 2 Tennis Coach
- 1st place, UTS Sustainability Startup Weekend (2019) • Runner-up, Techstars Startup Weekend Sydney (2023)
- Languages: English (fluent), Russian (fluent), French (conversational)
